PATENT COOPERATION TREATY

From the INTERNATIONAL SEARCHING A	UTHORITY	ANC.				
To:			PCT PTON			
			RITTEN OPINION OF THE CONAL SEARCHING AUTHORITY			
,			(PCT Rule 43bis.1)			
		Date of mailing (day/month/year)				
Applicant's or agent's file reference IP050102T		FOR FURTHER ACTION See paragraph 2 below				
International application No. PCT/JP2005/000265	International filing date 13.01.2005	•	Priority date (day/month/year) 22.01.2004			
International Patent Classification (IPC	2) or both national classification ar	nd IPC	- 			
Applicant FUJIKIN INCORPORA						
This opinion contains indicat	tions relating to the following items	s:				
Box No. I Bas	sis of the opinion					
Box No. II Pric	ority					
Box No. III No.	Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
Box No. IV Lac	ck of unity of invention					
Box No. V Rea	asoned statement under Rule 43bis. olicability; citations and explanation	.1(a)(i) with regard to rens supporting such stat	novelty, inventive step or industrial ement			
Box No. VI Cer	rtain documents cited					
Box No. VII Cer	rtain defects in the international app	plication				
Box No. VIII Cer	rtain observations on the internation	nal application	•			
2. FURTHER ACTION If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.						
PCT/ISA/220 or before the ex	re appropriate, with amendments, xpiration of 22 months from the pri	before the expiration	A, the applicant is invited to submit to the IPEA a of 3 months from the date of mailing of Form expires later.			
For further options, see Form	PCT/ISA/220.		•			
3. For further details, see notes t	to Form PCT/ISA/220.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2005/000265

Box	No. I Basis of this opinion	
1.	With regard to the language, this opinion has been established on the basis of the international application in the language in which it villed, unless otherwise indicated under this item.	vas
	This opinion has been established on the basis of a translation from the original language into the following language	•
	Rule 12.3 and 23.1(b)).	ler
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claim invention, this opinion has been established on the basis of:	ned
	a. type of material	
	a sequence listing	
	table(s) related to the sequence listing	
	b. format of material	
	in written format	
	in computer readable form	
	c. time of filing/furnishing	
	contained in the international application as filed.	
	filed together with the international application in computer readable form.	
	furnished subsequently to this Authority for the purposes of search.	
3.	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application filed or does not go beyond the application as filed, as appropriate, were furnished.	or

Claims 1-10

Documents 1-3 are reference drawings showing the general state of the art in the technical field concerned.

None of the documents cited in the ISR describes or suggests a vacuum heat insulation valve consisting of (a) a valve having a valve body and an actuator and (b) a vacuum heat insulation box accommodating the said valve, in which (1) the vacuum heat insulation box consists of a lower rectangular vacuum jacket having cylindrical vacuum heat insulation pipe receivers on a lateral face and open at the top face and an upper rectangular vacuum jacket open at the bottom face and airtightly engaged with the lower vacuum jacket, with the upper vacuum jacket on the lower vacuum jacket; (2) the inner and outer walls of the lower vacuum jacket are bent inwardly at the top end, to form a collar, for forming a joint portion; (3) the outer wall of the lower vacuum jacket is bent outwardly at the middle portion in the height direction, to form a color, for forming a joint portion; (4)

the inner and outer walls of the upper vacuum jacket are bent outwardly at the bottom end, to form a collar, for forming a joint portion; (5) the vacuum heat insulation side wall of the upper vacuum jacket is positioned outside the vacuum heat insulation side wall of the lower vacuum jacket, for combining both the jackets; and (6) the joint portion at the bottom end of the upper vacuum jacket and the joint portion on the outer wall side of the lower vacuum jacket are kept in air-tight contact with each other through a heat insulating material layer, while the inner wall of the ceiling portion of the upper vacuum jacket and the joint portion at the top end of the lower vacuum jacket are kept in air-tight contact with each other through a heat insulating material layer.
